TRADING HIGHLIGHTS

The Coffee, Sugar & Cocoa Exchange, Inc. experienced its fifth consecutive record volume year in 1990. 11,994,437 contracts traded, representing about 2 1/2 times the volume traded in 1980. Options provided a strong impetus for the volume growth, with annual records set in coffee, cocoa and sugar. Options, which did not exist at the start of the 1980's, now represent 25 percent of the Exchange's total volume. In 1990, options volume alone was double the total exchange volume in 1977. Annual record volumes were set in 1990 in coffee "C", cocoa and sugar 14 futures.

Coffee futures trading volume surged 34 percent above the previous year's record, while options trading more than doubled. After bottoming in early October 1989 at $0.68/lb, coffee prices trended higher to about $1.05/lb in early March, then ranged between $0.80/lb and $1.00/lb through the remainder of the year.

Cocoa prices reached a 14-year low of $890/metric ton in late November 1989 and rallied strongly into the first half of 1990, reaching a high of $1,525 in late May. Political unrest and concerns about dry weather in the Ivory Coast, the world's largest cocoa producer, provided the major upward thrust. Eventual realization that high quality cocoa supplies from the Ivory Coast would be ample propelled prices into a trading range of between $1060 and $1335 through year end.

A five year irregular uptrend in sugar 11 prices came to a halt on May 4 when the July 1990 contract dropped 1.16 cents per pound on a daily record total volume of 81,320 contracts. The July 1990 contract had reached a new life-of-contract high of 16.27 cents/lb a few days earlier. The sharp decline was sparked by the first of several trade reports to indicate a less bullish supply/demand balance than had previously been perceived. As the year progressed, more analysts forecast that 1990/91 ending stocks, as a percent of consumption, would rise somewhat rather than decline. As the year ended, prices hovered near their October lows of just above 9 cents/lb.

1991 TRADING HIGHLIGHTS

Nineteen hundred and ninety-one volume of 9,488,768 contracts was the Exchange's fourth largest ever and was 65 percent higher than the volume done just 5 years ago, despite registering its first year-to-year decline in 7 years. Coffee options volume established a new record and coffee futures volume was virtually equal to the record set in 1990. The Exchange launched Coffee Euro-Differential futures in April, providing a means to hedge the price risk and to make or take delivery of Arabica coffee in Europe. In addition, cocoa futures and options trading was expanded to a 24 month cycle from an 18 month cycle in June.

Coffee futures volume reached 1,772,648 contracts, just 1,402 short of the record set just a year ago. A daily volume record of 20,642 was established on November 18, spurred by heavy liquidation of the December 1991 contract prior to first notice day. Coffee options trading rose to a record 411,550 contracts, 46% higher than the record 282,566 contracts set in 1990. An open interest record was established in coffee options of 44,950 contracts on October 31. Since reaching a 14 year low of 68 cents/lb in October 1989 following the collapse of the International Coffee Agreement (ICA), and a recent high of $2.76 in January 1986, prices ranged between 70.00 cents to $1.05/lb. This fairly wide trading range and the uncertainty introduced by free trading in the absence of the ICA contributed to the fairly robust volumes in coffee futures and options.

The past two years witnessed surplus supply/demand balances in sugar as world production exceeded world consumption. This was preceded by five consecutive years of deficit supply/demand balances. Consequently, sugar 11 prices settled into an uncharacteristically narrow trading range of between 8 and 9 cents/lb after establishing a 1991 low of near 7.50 cents/lb in May. Total 1991 sugar 11 futures volume registered 4,268,546 contracts. Sugar options trading volume came to 1,512,976 contracts.

After declining to $860/metric ton in late June, the lowest price in 18 years, cocoa prices began a recovery sparked by reports of poor crop prospects in Brazil and other major producing countries in West Africa. With the increasing realization that world cocoa supply/demand would undergo its first deficit in 8 years, prices continued to rally, and as the year ended, prices settled near to their 1991 highs of around $1300/metric ton. Cocoa futures trading volume corresponded strongly with price direction. To wit, futures trading volume during the first half of the year was substantially below the same year ago period, but picked up to be the second largest ever second-half volume. Total 1991 cocoa futures volume amounted to 1,227,519 contracts. Cocoa options volume totalled 163,610 contracts.
